Active Directory / LDAP Integration Add-On Package

Active Directory / LDAP Integration Add-On Package

Active Directory/ LDAP Integration

The Active Directory/ LDAP Integration add-on package helps you configure ownCloud with one Active Directory/LDAP domain.

The package includes deployment of:

- Integration of ready-to-scale and reliable Active Directory/LDAP user management
- Possibility to share files with 2 Active Directory groups that have access to ownCloud

Benefits:

- Fixed-price integration service
- Best-practice integration by the vendor
- Leverage existing user management platform
- Easy content collaboration based on your Active Directory/LDAP structure

Timeline

If the package is purchased at the same time as the ownCloud Standard Deployment Package, the lead time of this Add-on Package will follow the lead time for the Standard Deployment Package. If purchased as a single add-on at a later stage, the typical lead time is between two to three weeks.

During this lead time period, a joint discovery call is organised, to align on project parameters and integration date. Prior to the deployment date. Provision of customer pre-requisites (as specified below) are typically due during this lead time period. The integration date may be adjusted if customer pre-requisites are not complete

Pre-requisites

- Order of an ownCloud Standard Deployment Package
- SSH services must be running on VM
- An ownCloud Approved Environment (oCAE), as initial delivery with the ownCloud Standard Deployment Package
- ownCloud users must be members of a dedicated ownCloud group
- Current supported Microsoft Active Directory Server compliant with LDAP Version 2 and Version 3
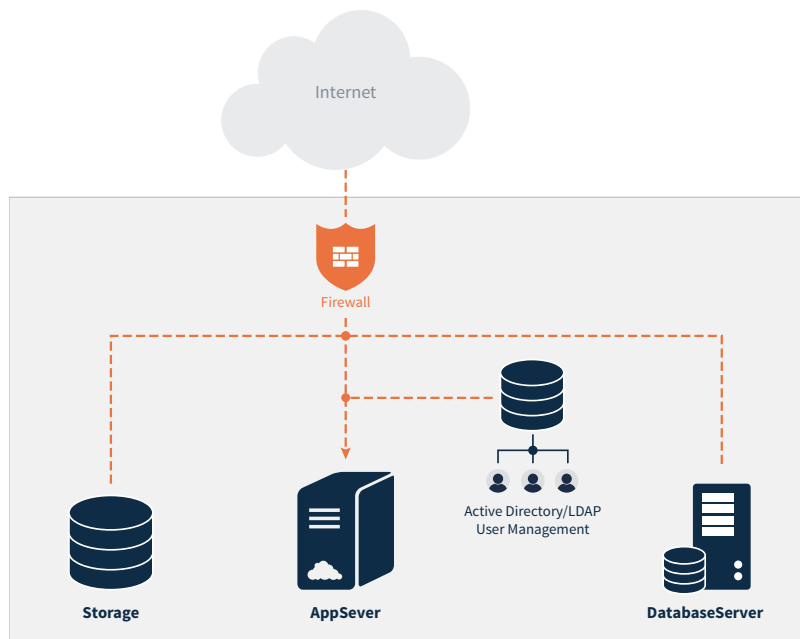

About ownCloud Service Packages

ownCloud is designed for easy and efficient implemen-tations. The service packages are designed for quick deployments of a reliable and ,production-ready ownCloud environment in your organisation.
