

ownCloud Health Check

Ensure that your systems are in alignment with ownCloud best practices.

ownCloud Health Check

—— The ownCloud HealthCheck program is designed to ensure that customers receive the benefit of ownCloud project experience and expertise to validate their ownCloud Enterprise installation.

Customers with an existing ownCloud installation want to ensure that their systems are in alignment with ownCloud best practices. Our Professional Services will review and evaluate your current ownCloud deployment in order to identify opportunities to optimise operability, maintainability and make your investment future proof.

Approach

Based upon the understanding of the customer business needs and industry best practices, our Professional Services will evaluate the following ownCloud aspects:

- Redis Server
- APCU Caching
- PHP Version
- runtime and opcache configuration
- status of the virtual machines and
- Analysis of your ownCloud environment.

With these data points, our Professional Service will suggest changes and enhancements to your existing installation. These may include suggestions for using additional apps or features from a newer ownCloud version.

Advantages

The HealthCheck will ensure that ownCloud best practices are implemented. This leads to optimised loading and response times, enhanced operability, maintainability and increases the return on investment for future developments.

Outcomes

- HealthCheck analysis and recommendations report
- architectural map of your ownCloud environment

About ownCloud

ownCloud is the market leading open source content collaboration solution worldwide. ownCloud enables users to securely access and share data from any device, anywhere in the world. With more than 200,000 installations and 50 million users, ownCloud provides organizations a modern collaborative experience, thereby boosting productivity without compromising on security. At the same time, it gives organizations the visibility and control required to manage sensitive data.
