

Service Package Scale

Best-practice migration for global deployments

Best-practice migration for global deployments

Is this service for you?

You know the value of ownCloud and have deployed it in your enterprise. You have hundreds of production users. Now you want to scale the solution to your entire global enterprise. You could manage the migration with your own IT resources, but it's a major project and you'd rather focus on mission-critical tasks. And, it's absolutely essential that the global scaling goes smoothly.

The ownCloud Scale Service Package provides best-practice guidance in scaling your installation to serve your global enterprise, up to thousands or even bigger. We understand how to work through the deep issues of large-scale global installations to ensure success.

How it works

This package provides up to ten days depending on a classification call with our professional service experts, who work with you through all phases of your deployment or expansion. We help you integrate with back-end systems and outside parties such as buyers and partners, and we guide you through the planning and deployment of disaster recovery sites, clustered databases and file systems, and other elements that are critical to global deployments.

What's included

- **Structured scaling plan based on your success criteria**
- **Migration guidance and assistance from the existing infrastructure**
- **Assistance with disaster recovery planning and procedures**
- **Architecture overview documentation**
- **Integration for out-of-the-box Enterprise Apps**
- **Sizing guidance and recommendations to accommodate continued growth**
- **Test plan documentation**
- **Up to ten days of consulting**
- **Remote or onsite assistance**

Benefits

- 1 **Assured successful global roll-out**
- 2 **Smooth integration with backend systems and partners**
- 3 **Architected to grow as your user base grows**
- 4 **Best practices applied to your enterprise**

Take your investment further with ownCloud Service Packages

ownCloud is designed for easy implementation in most IT environments. To make it even easier, ownCloud offers a series of Service Packages with targeted service options, so you can get exactly the help you need. Let us do the work. Choose the ownCloud Service Package that meets your needs, and take your investment further, faster.
