

# Windows File Server Integration Add-On Package

# Windows File Server Integration Add-On Package

## Windows File Server Integration

This Add-on Package configures ownCloud for a reliable Windows File Server integration. In addition a listener will be set up, to ensure that file changes on the integrated Microsoft File Server Share are visible to all the users.

The package includes deployment of:

- Integration service of up to two (2) Windows File Servers with a total of 5 shares
- Assisting the administrators in making ownCloud your reliable content collaboration platform

### Benefits:

- Fixed-price integration service
- Best-practice integration by the vendor
- Transparent access to existing Windows File Server shares

## Timeline

If the package is purchased at the same time as the ownCloud Standard Deployment Package, the order will be completed within the standard deployment time-frame of six weeks. If purchased as a single add-on at a later stage, the expected delivery time frame is between two to three weeks.

During this lead time period, a joint discovery call is organised, to align on project parameters and integration date. Prior to the deployment date, provision of customer pre-requisites (as specified below) are typically due during this lead time period. The integration date may be adjusted if customer pre-requisites are not complete

## Pre-requisites

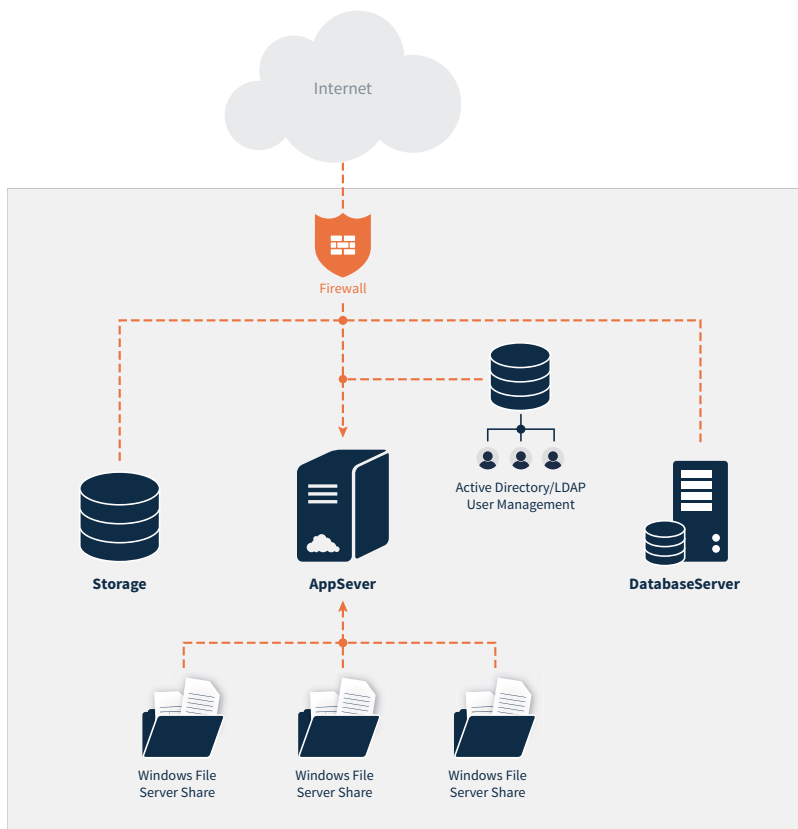

- Order of an ownCloud Standard Deployment Package
- Active subscription for an ownCloud Enterprise Edition
- Valid license for a Microsoft Server Version, supported according to Microsofts Support Lifecycle (<https://support.microsoft.com/de-de/help/13853/windows-lifecycle-fact-sheet>)
- SSH services must be running on the VM of the ownCloud server

## About ownCloud Service Packages

ownCloud is designed for easy and efficient implementations. The service packages are designed for quick deployments of a reliable and ,production-ready ownCloud environment in your organisation.
