Services

Testing Service - Service Addon

Testing Service - Service Addon

For any kind of individually delivered services to our customers, such e.g. branding services of ownCloud UI or delivery of specific feature requests, ownCloud delivers extended testing services. The respective testing service follows a mutually scoped and agreed testplan with our customers. It goes beyond the usual ownCloud internal QA for any software or service deliveries, aiming to ensure enrollability of ownCloud deliveries within customers IT landscape according to customers operational quality assuance metrics. For example validation of feasibility for automated rollout of individualized ownCloud Client software following the existing software deployment procedures of the customer, leveraging customers available toolset.

Availability

Available based on a mutually agreed and scoped test- and acceptance plan, specified in a SOW. Delivery will be performed by ownCloud Consulting Services on a times and material basis.

Deliveries

- Analyzing the technology environment and mutual specification of the testing parameters, metrics and accepteance criteria.

- Execution of SOW based testplan

- Documentation of Testing results

Skill-level

- ownCloud expert with 2+ years project experience

- Execution of SOW milestones

About ownCloud

Organizations that must share confidential data internally and externally rely on ownCloud's onpre¬mises enterprise Universal File Access platform. Only ownCloud gives IT the visibility and control required to manage sensitive data, preserve business processes, and integrate with existing compliant infrastructures while offering users the modern collaboration experien¬ce they demand. This is made possible through ownCloud's open, modular architecture, extreme exten¬sibility and unique federated cloud sharing capabilities.
